***Allowable Subject Matter***

1. Claims 2-10 and 12-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As to claims 2 and 12, the prior arts of record do not anticipate or render obvious to one skilled in the art the claimed display module wherein one of the flexible substrate for the signal line drive circuit or the scanning line drive circuits made of a chip on film having a substrate thickness of 40  $\mu\text{m}$  or less. It is common to form flexible substrate with a chip on film (COF) since the COF type driving IC is loaded on a more flexible film than the TCP type driving IC. However, none of the prior arts alone or in combination with any other cited arts teach or suggest or motivate the one skilled in the art the claimed thickness along with other recitations.

As to claims 3 and 13, the prior arts of record do not anticipate or render obvious to one skilled in the art the claimed display module wherein one of the flexible substrate for the scanning line drive circuit and the signal line driving circuit has an oblique folding slit at a bending part wherein the bending part is formed along the slope of the sloped back surface member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
